| *Notes*

1. Electronic transformer dimmer performance depends greatly in quality and specifications of the transformer being used. In general, most electronic transformers may cause flickering and other visual artifacts due to the low wattage consumed.

2. Photo shown is the LED MR11 6SMD not the LED MR11 10SMD. The only difference is the quantity of SMD chips on the top of the lamp. The 10SMD has an additional 4 SMD chips.
